

### **Wheels of Time Scholarship Details**

The Wheels of Time Street Rod Association is interested in the future of the hobby of Street Rodding. Because of this, we want to support the development of skills which are essential to the continuance of the hobby.

The Wheels of Time will be awarding \$750 scholarships per semester to those who intend to further their education in the areas of Auto Mechanics, Auto Body and Welding. We will also be awarding \$750 tool scholarships for those graduates entering the automotive workforce directly. Applicants must live within 50 miles of Allentown PA to be considered.

Students must complete the application process, provide all of the information and documentation requested and then undergo an interview with the Wheels of Time Scholarship Committee. The winning applicants will be asked to attend one Wheels of Time business meeting each year and will be expected to volunteer for the annual Wheels of Time Rod & Custom Jamboree unless they are attending school at the time out of the area. This event is the money source for the scholarships. The scholarship winner(s) will also need to inform their school that the Wheels of Time SRA will need to be sent copies of the student's grades, the student will need acceptable grades to continue in the scholarship program. If the student should drop out of school, they will need to notify the Wheels of Time SRA chairperson immediately.

I would like to congratulate you for continuing your education. This process could take up to 90 days to process so please submit your application and the required documentation in a timely manner. If you have any questions, please reach out to me directly by email at [dan478@aol.com](mailto:dan478@aol.com). Please put Wheels of Time Scholarship in the subject line.
